Advance Flat Rate Shipping Method For WooCommerce(1.1)

This is the help documentation for the Advance Flat Rate Shipping Method plugin for the WooCommerce. Before installing and using the plugin, we recommend going through this manual.

If you've tried this manual and it hasn't solved your issue, please feel free to contact us at wordpress@multidots.in

When you get in touch with us let us know the **means you've attempted** to solve the problem. Thanks!

Contents

1. Introduction
2. Requirements
3. Downloading & Installation
4. How to use the plugin?

Introduction

“Advance Flat Rate Shipping Method” plugin opens the possibility to create customize shipping options. WooCommerce offers few default shipping rate options but based on your country rules and regulation and nature of your business, you always need more options to setup the shipping rates in our stores. With “Advance Flat Rate Shipping Method” we provide you options to create as many flat rate shipping methods you need and can set the custom rules as per your need. You can configure the flat rate shipping for - ‘Specific product’ , ‘Specific category’ , ‘Specific Tag’ , ‘Specific classes’ etc.

Requirements

- WordPress 3.8+
- WooCommerce 2.3+
- jQuery (comes with WordPress 3.8+)
- jQueryUI (comes with WordPress 3.8+) Latest browser, like Firefox or Chrome.

Downloading & Installation

Upload via WordPress Admin Panel

1. Log into WordPress and Plugins page
2. Select the .zip file you downloaded and click Install
3. Enter your FTP information if required and install the plugin
4. Activate the plugin

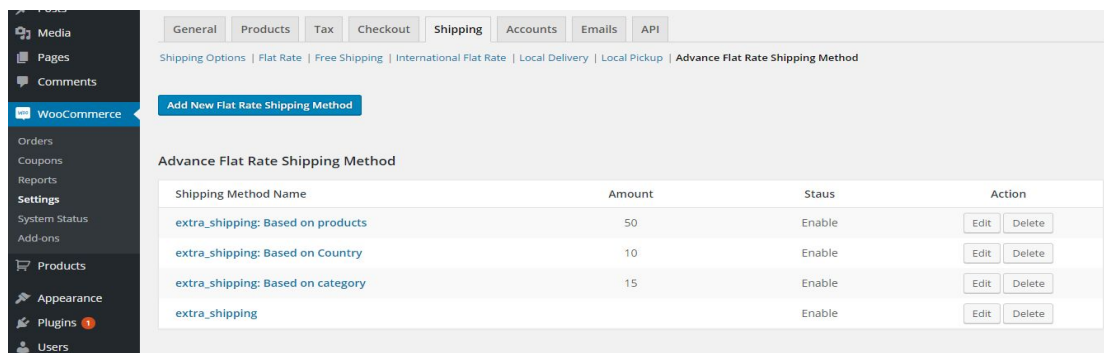

Upload via FTP

1. Unzip the .zip file you downloaded.
2. Upload the “WooCommerce Advance Flat Rate Shipping Method” plugin folder to your WP-content/plugins directory.
3. Navigate to your Admin Panel: Plugins.
4. Under “WooCommerce Advance Flat Rate Shipping Method”, click Activate.

How to use the plugin?

1. Getting Started

Once you have installed the plugin, you have to visit **Woo commerce >> Setting >> Shipping >> WooCommerce Advance Flat Rate Shipping Method** to use it. You will get this interface to add new shipping methods and configure the existing shipping methods.

You can create new shipping methods and manage existing shipping methods from here. All the Advance Flat Rate Shipping Method that you have created before will be listed here and you can edit, enable/disable or delete it from here.

1. Advance Flat rate Shipping Method Configuration

Advance Flat rate Shipping methods configuration

Enable/Disable

☒ Enable this shipping method (This method will be visible to customers only if it is enabled.)

Enter Shipping Method Name *

extra_shipping: Based on products

This name will be visible to the customer at the time of checkout. This should convey the purpose of the charges you are applying to the order. For example "Ground Shipping", "Express Shipping Flat Rate", "Christmas Next Day Shipping" etc

Enter Short Description about this Shipping method

Extra Advance Flat Rate Shipping Based on products

Enter few words about this shipping method. This will help your customers to understand the shipping charges in more detailed way.

Enter Amount to Charge *

50

This amount will be added to the sub total of the order when customer selects this shipping method. You can enter direct amount or make it dynamic using parameters. Below are the parameters you can use: [qty] = number of items, [cost] = cost of items, [fee percent="10" min_fee="20"] = Percentage based fee. Below are some of the examples: "10.00" - To charge flat 10.00 shipping charge "10.00 * [qty]" - To charge 10.000 per quantity in the cart. It will be 50.00 if the cart has 5 qty. "[fee percent="10" min_fee="20]" - This means charge 10 percent o sub total of order, minimum 20 charge will be applicable.

1) Enable/Disable:

You can disable the existing shipping methods that you have already created and do vice-versa!

2) Enter Shipping Method Name

This name will be visible to the customer at the time of checkout. This should convey the purpose of the charges you are applying to the order. For example "Ground Shipping", "Express Shipping Flat Rate", "Christmas Next Day Shipping" etc

3) Enter Short Description about this Shipping method

Enter few words about this shipping method. This will help your customers to understand the shipping charges in more detailed way.

4) Enter Amount to Charge

This amount will be **added to the sub total of the order** when customer selects this shipping method. You can enter direct amount or make it dynamic using parameters.

Below are the parameters you can use: [qty] = number of items, [cost] = cost of items, [fee percent="10" min_fee="20"] = Percentage based fee. Below are some of the examples: "10.00" - To charge flat 10.00 shipping charge "10.00 * [qty]" - To charge 10.000 per quantity in the cart. It will be 50.00 if the cart has 5 qty. "[fee percent="10" min_fee="20"]" - This means charge 10 percent o sub total of order, minimum 20 charge will be applicable.

2. Advance Flat rate Shipping method Rule

2. Flat Rate Shipping Method For Specific Products

Use this feature when you want to make the shipping method visible only for specific products.

Select Specific Products

Select Specific Category

Select Specific Tag

Provides all products on drop down list. From drop down list you can able to select one or more products.

For example, if you select "Basketball" as product, the current shipping method will only be visible if the customer has added "Basketball" product in his current cart.

3) Flat Rate Shipping Method For Specific Category

Using this feature you can restrict your shipping method to be visible only for products of specific category.

The screenshot shows the configuration interface for the Flat Rate Shipping Method. It includes three main sections: "Select Specific Category", "Select Specific Tag", and "Select Specific SKU". The "Select Specific Category" section is highlighted with a red box, and a dropdown menu is open, showing a list of categories: Beauty, Health & Gourmet; Cameras, Audio & Video; clothes; Computers & Accessories; Home, Kitchen & Pets; Mobiles & Tablets; and Sports. A red callout box points to the dropdown menu with the text: "From drop down list you can able to select one or more categories products." Below the dropdown menu, there is a text input field for "Select some sku" and a note: "Using this feature you can restrict your shipping method to be visible only for products of specific SKU. For example, you can create a new method like 'Christmas Urgent \$50'. This method should be visible only when the cart has a product of 'CHRISTMAS007' SKU."

For example, you can create a new method like "Expensive Shipping \$50". This method should be visible only when the cart has any product from "Glass Products" category.

4) Flat Rate Shipping Method For Specific Tag

This Option allows you to add shipping method on Specific product tag. using this feature you can restrict your shipping method to be visible only for products from specific tag.

The screenshot shows the configuration interface for the Flat Rate Shipping Method. It includes three main sections: "Select Specific Tag", "Select Specific SKU", and "Select Specific User". The "Select Specific Tag" section is highlighted with a red box, and a dropdown menu is open, showing a list of tags: Beauty, Health & Gourmet; clothes; Computers & Accessories; and Mobiles & Tablets. A red callout box points to the dropdown menu with the text: "From drop down list you can able to select one or more tag." Below the dropdown menu, there is a text input field for "Select some user" and a note: "When you want to make a shipping method visible only for selected user you can use this feature. For example, let us say you want to create a shipping method for your favorite buyer called 'Special Shipping for JamesSmith - \$10' for all his bulk orders. In this case, you have to chose james username in this textbox. Then this shipping method will only be visible to JamesSmith."

For example, you can create a new method like "Special shipping \$100". This method should be visible only when the cart has any product having "fragile" tag.

5) Flat Rate Shipping Method For Specific SKU

Using this feature you can restrict your shipping method to be visible only for products of specific SKU.

For example, you can create a new method like "Christmas Urgent \$50". This method should be visible only when the cart has a product of "CHRISTMAS007" SKU.

6) Flat Rate Shipping Method For Specific User

When you want to make a shipping method visible only for selected user you can use this feature.

For example, let us say you want to create a shipping method for your favorite buyer called "**Special Shipping for JamesSmith - \$10**" for all his bulk orders. In this case, you have to chose James user-name in this text-box. Then this shipping method will only be visible to JamesSmith.

7) Flat Rate Shipping Method For Specific Role

When you want to make a shipping method visible only for users from a specific group/role you can use this feature.

The screenshot shows the 'Select Specific User' dropdown menu with the following options: admin, Demouser, and testuser. A red box highlights the dropdown, and a red callout box points to it with the text: "Provides all users' on drop down list. From drop down list you can able to select one or more users." Below the dropdown, there is a text input field labeled "Select some user role" and a paragraph of explanatory text.

Select Specific User

admin
Demosuer
testuser

Select some user role

When you want to make a shipping method visible only for users from a specific group/role you can use this feature. For example, let us say you want to create a shipping method for all your wholesale customers called "Wholesale Shipping - \$100" for all bulk orders. Then you can select the "wholesale" in this textbox.

Select Coupon

Select some Coupon

Using this feature you can restrict the shipping method only to be visible if the specified coupon is used on the current order. For example, let us say you want to offer a discounted shipping rate for your email campaign. You can create this method like "CyberMonday 2016 Shipping \$5", and this will be only visible if customer uses the coupon you shared on your email campaign "CyberMonday2016". You can achieve this using this feature.

For example, let us say you want to create a shipping method for all your wholesale customers called **"Wholesale Shipping - \$100"** for all bulk orders. Then you can select the "wholesale" in this textbox.

8) Flat Rate Shipping Coupon

Using this feature you can restrict the shipping method only to be visible if the specified coupon is used on the current order.

The screenshot shows the 'Select Coupon' dropdown menu with the following options: r9a8qew, dpd96, jaqw25, cri95co, and di88qw. A red box highlights the dropdown, and a red callout box points to it with the text: "Provide All Coupons on Drop down list. From Drop down list you can able to Select one or More Coupons". Below the dropdown, there is a text input field labeled "Order amount specific Shipping method - If less than" and a paragraph of explanatory text.

Select Coupon

r9a8qew
dpd96
jaqw25
cri95co
di88qw

Order amount specific Shipping method - If less than

Order amount specific Shipping method - If greater than

0

Only to be visible if the specified coupon is used on the current order. For example, your email campaign. You can create this method like "CyberMonday 2016 Shipping \$5", and this will be only visible if customer uses the coupon you shared on your email campaign "CyberMonday2016". You can achieve this using this feature.

In this case, the shipping method will only be visible to customer if the order amount is less than 500. For orders more than 500 it will not be visible. You can use this feature, when you want to skip shipping charge when the order amount is higher than what you specified.

Here you can enter minimum order amount after which the shipping method should be visible. For example, you can specify this like 500. In this case, the shipping method will only be visible to customer if the order amount is greater than 500. For orders smaller than 500 it will not be visible. You can use this feature, when you want to skip shipping charge when the order amount is less than what you specified.

For example, let us say you want to offer a discounted shipping rate for your email campaign. You can create this method like **"CyberMonday 2016 Shipping \$5"**. and this will be only visible if customer uses the coupon you shared on your email campaign **"CyberMonday2016"**. You can achieve this using this feature.

9) Order amount specific Shipping method - If less than and If greater than

You can achieve this using this feature.

Order amount specific Shipping method - If less than

10

Please Add Maximum order amount If Greater than It will be Visible

Here you can enter maximum order amount to for which the shipping method should be visible. For example, you can specify this like 500. In this case, the shipping method will only be visible to customer if the order amount is less than 500. For orders more than 500 it will not be visible. You can use this feature, when you want to skip shipping charge when the order amount is higher than what you specified.

Order amount specific Shipping method - If greater than

0

Please Add Minimum order amount If Less than It will be Visible

Here you can enter minimum order amount after which the shipping method should be visible. For example, you can specify this like 500. In this case, the shipping method will only be visible to customer if the order amount is greater than 500. For orders smaller than 500 it will not be visible. You can use this feature, when you want to skip shipping charge when the order amount is less than what you specified.

Order amount specific Shipping method - If less than

Here you can enter maximum order amount to for which the shipping method should be visible.

For example, you can specify this like 500. In this case, the shipping method will only be visible to customer if the order amount is less than and equal to 500. You can use this feature, when you want to skip shipping charge when the cart total weight is higher than what you specified.</small>		

Quantity specific Shipping method - If less

Here you can enter maximum cart quantity for which the shipping method should be visible.

For example, you can specify this like 5. In this case, the shipping method will only be visible to customer if the cart has less than and equal to 5 quantity in it. For cart having more than 5 quantity it will not be visible. You can use this feature, when you want to skip shipping charge when the cart quantity is higher than what you specified.

Quantity specific Shipping method - If greater than

Here you can enter minimum cart quantity after which the shipping method should be visible.

For example, you can specify this like 5. In this case, the shipping method will

only be visible to customer if the cart quantity is greater than 5. For cart having less than and equal to 5 quantity it will not be visible. You can use this feature, when you want to skip shipping charge when the cart quantity is less than what you specified.

12) Should the shipping amount be taxable?

If Tax Status is "Yes" then tax rate will apply on Shipping Cost as well. You can Manage your Tax rate by

13) Flat Rate Shipping Method apply Forcefully

For special request from customers. We have introduced new feature into our plugin. By using this functionality, You can able to apply shipping method forcefully.

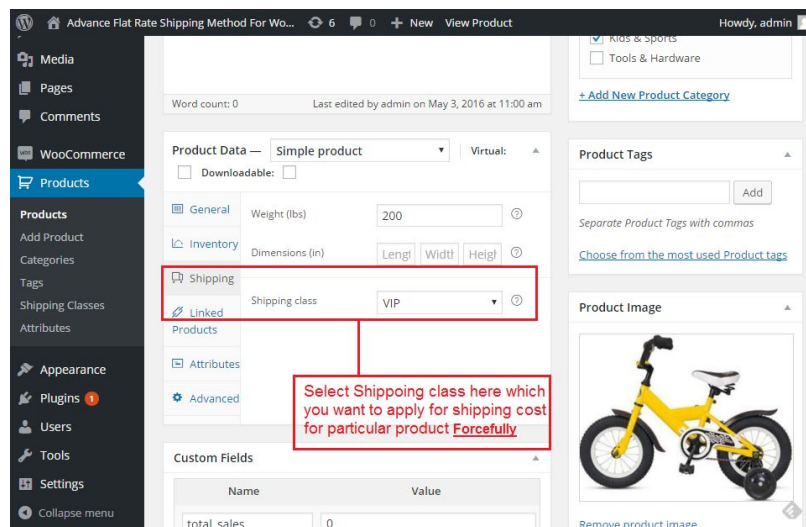

This feature is only available for **default "Extra Shipping"** shipping method. We have provide a select Class interface in 'Extra Shipping' method. Where you can choose one Shipping class.

If you would like to apply forcefully shipping method then you have to create "Shipping Class" then use that Shipping Class to all these products for those you would like to add Shipping rate when these products are into the cart.

How Create Forcefully fate rate shipping method

Step 1: Create custom Shipping class. (eg. VIP)

Step 2: Assign that custom shipping class to particular product.” From Product edit page>> Shipping tab >>and select custom shipping class.”

Step 3: Select default extra shipping method and choose shipping class from “select class” option.

Calculation Type

Per Class: Charge shipping for each shipping cl..

Save changes

If you like WooCommerce please leave us a ★★★★★ rating. A huge thank you from WooThemes in advance!

Version 4.4.2

The shipping class cost will be added on the top of main cost. **For example** If you set \$10 as main cost and also add \$5 cost on particular shipping class “microwave crockery”. So, if user buys “microwave bowl set” and this product have “microwave crockery” shipping class then this shipping method is apply on cart but the cost is \$15 (\$10 [main cost] + \$5 [Shipping class cost]).

You can enter a cost in two formats.

For example:

1) Cost = 10.00 :

If main cost \$10, if this shipping class apply at that time shipping method total cost apply on cart is (\$10 + \$10) = \$20.

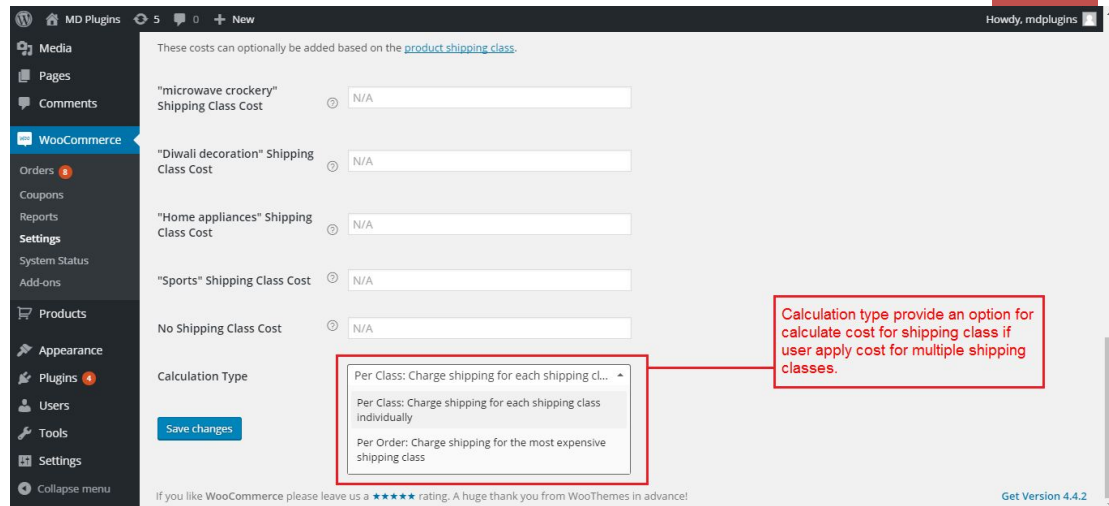

2) Cost = 10.00*[qty]

Where,

[qty]= number of products items,

For Example, If you want to add cost on shipping class based on product Quantity then you have to write cost * qty. If you set \$5 cost based on quantity for shipping class “microwave crockery” then it will react as [5]*[qty]. Now main cost is \$10 and product qty is 3 then total costs apply is {(\$10 [main cost]) + ((\$5 X [3] [Shipping class cost]))} = \$25.

3.2 Calculation Type :

A) Charge Shipping for each Shipping Class individually

Charge shipping for each shipping class individually : If you chose this option then shipping class charges for each class individually.

For Example, if you set \$5 cost on “microwave crockery” shipping class and \$10 cost on “kids cloths” and select ‘Per Class’. User buys two products which have these classes. Then it will calculate per class cost as $\$5 + \$10 = \$15$ as shipping class cost.

B) Charge Shipping for the most expensive Shipping class:

Charge shipping for the most expensive shipping class. If you chose this option then shipping class charges for per order based on most expensive shipping class in the group.

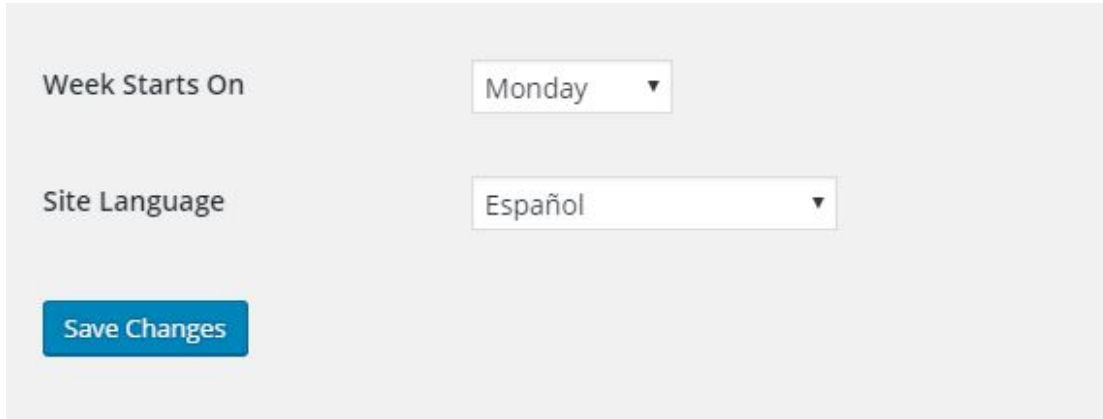

For Example if you set \$5 cost on “microwave crockery” shipping class and \$10 cost on “kids cloths” and select “Per order” and User buy two products which have these classes. Then it will calculate per order cost as \$10 as shipping class cost. [Because “kids cloths” shipping class is most expensive class on cart]

4. Localization

Advance Flat Rate Shipping Method For WooCommerce will translate based off your WordPress language setting by default. The rest of the plugin was also developed with localization in mind and is ready for translation. Currently, **In our plugin will support English and Spanish language**. If you would like to add more language then please generate .mo file and load in our plugin.

How to localization Language setting:

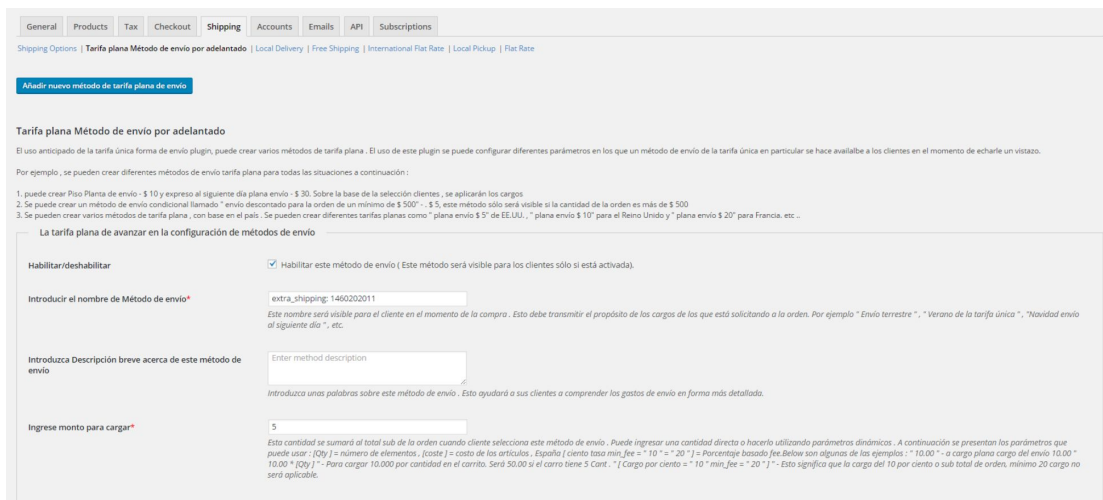

1. Select Spanish Language from WordPress admin panel Settings: **Go to Settings >> General >> Site Language And select Espanol** language to translate this plugin into Spanish language.
2. After choose Espanol language our plugin will translate it into Spanish language. See attached screen shot.

[Añadir nuevo método de tarifa plana de envío](#)

Tarifa plana Método de envío por adelantado

El uso anticipado de la tarifa única forma de envío plugin, puede crear varios métodos de tarifa plana. El uso de este plugin se puede configurar diferentes parámetros en los que un método de envío de la tarifa única en particular se hace available a los clientes en el momento de echarle un vistazo.

Por ejemplo, se pueden crear diferentes métodos de envío tarifa plana para todas las situaciones a continuación:

1. puede crear Piso Planta de envío - \$ 10 y expreso al siguiente día plana envío - \$ 30. Sobre la base de la selección clientes, se aplicarán los cargos
2. Se puede crear un método de envío condicional llamado "envío descontado para la orden de un mínimo de \$ 500" - \$ 5, este método sólo será visible si la cantidad de la orden es más de \$ 500
3. Se pueden crear varios métodos de tarifa plana, con base en el país. Se pueden crear diferentes tarifas planas como "plana envío \$ 5" de EE.UU., "plana envío \$ 10" para el Reino Unido y "plana envío \$ 20" para Francia, etc. .

La tarifa plana de avanzar en la configuración de métodos de envío

Habilitar/deshabilitar ☒ Habilitar este método de envío (Este método será visible para los clientes sólo si está activada).

Introducir el nombre de Método de envío*

Este nombre será visible para el cliente en el momento de la compra. Esto debe transmitir el propósito de los cargos de los que está solicitando a la orden. Por ejemplo "Envío terrestre", "Verano de la tarifa única", "Navidad envío al siguiente día", etc.

Introduzca Descripción breve acerca de este método de envío

Introduzca unas palabras sobre este método de envío. Esto ayudará a sus clientes a comprender los gastos de envío en forma más detallada.

Ingrese monto para cargar*

Esta cantidad se sumará al total sub de la orden cuando cliente selecciona este método de envío. Puede ingresar una cantidad directa o hacerlo utilizando parámetros dinámicos. A continuación se presentan los parámetros que puede usar: {Qty} = número de elementos, {coste} = costo de los artículos, {España} (costo tasa min_fee = "10" * = "20") = Porcentaje basado fee.Below son algunos de los ejemplos: "10.00" = a cargo plana cargo del envío 10.00 * 10.00 * {Qty} ~ Para cargar 10.000 por cantidad en el carrito. Será 50.00 si el carro tiene 5 Cant. " {Cargo por ciento = "10" * min_fee = "20"} ~. Esto significa que la carga del 10 por ciento o sub total de orden, mínimo 20 cargo no será aplicable.
